

 **BUCZEK – HB – ZPR Sp. z o.o.**

Majority shareholder – ROHRWERK MAXHÜTTE GmbH

DER FÜHRENDE HERSTELLER VON KALT GEZOGENEN PRÄZISIONSROHRE  
LEADING MANUFACTURER OF COLD DRAWN PRECISION STEEL TUBES

# BUCZEK – HB – ZPR Sp. z o.o. MAJORITY SHAREHOLDER – ROHRWERK MAXHÜTTE GmbH

**Buczek – HB – Zakład Produkcji Rur**, das Röhrenwerk wurde als die selbständige Gesellschaft am 1 Januar 2000 amtlich eingetragen. Damals, infolge der Wandlungen von Huta Buczek S.A., sind wir uns aus ihrer Strukturen abgesondert. Unsere Mehrheitgesellschafter ist ROHRWERK MAXHÜTTE GmbH.

Jedoch geht unsere Erfahrung in der Herstellung der Präzisionsrohre auf das Jahr 1882 zurück. In dieser Zeit wurden die Huldczyński Werke gegründet, und wir – als Zieherei Abteilung – haben die ersten Erfahrungen gewonnen. Heutzutage verfügen wir schon über die mehr als 100-jährige Tradition in der Herstellung von kalt gezogenen Rohren.

Aktuell füllen wir eine Marktnische aus, in welcher wir mit Erfolg und Genugtuung die Anforderungen der bestimmten Abnehmergruppe erfüllen.

Wir spezialisieren uns auf die Erzeugung von Stahlpräzisionsrohre – nahtlos und mit Naht – im Durchmesserbereich von 4 bis 95 mm und im Wandstärkebereich von 0,5 bis 5 mm.

Die Firmen aus dem Sektor von Kraftfahrzeugindustrie sind Abnehmer von 70,0% unseres Verkaufs.

Unter diesen Firmen befinden sich solche Marken wie Volvo, Opel und Fiat. Die übrig gebliebene Menge der Produktion findet den Weg zu solchen Abnehmern wie:

- Haushaltsartikelfirmen,
- Landwirtschaft,
- Zuckerfabriken,
- Energietechnik – Wärmetauscher, Druckeinrichtungen,
- Sport und Touristik,
- Möbelhersteller.

Buczek – HB – Röhrenwerk GmbH führt ebenfalls die aktive Qualitätspolitik. Vom Anfang des Bestehens am Markt hat man die Entscheidung über der Einführung des Qualitätsmanagementsystems getroffen. Wir verfügen über die Zertifikate nach DIN EN ISO 9001:2000 und DIN EN ISO 14001:1996 und jetzt sind wir im Laufe der Einführung des ISO TS 16949-Systems.

Unsere Firma besitzt ebenfalls die Anerkennung von ZETOM, PRS, Lloyd Register, BV und UDT als der Hersteller von Schiffsröhr, Kesselröhre, Präzisionsröhre, Konstruktions- und Mehrzweckröhre (Rohre für allgemeine Anwendungen).

Unsere Erzeugnisse besitzen die nationalen Gütezeichen, Qualitäts-eignungszeugnisse und Sicherheitszeichen.

Wir sind Mitglied der Industrie- und Handelskammer für Hüttenwesen mit ihrem Sitz in Katowice.

The tube manufacturer, **Buczek – HB – Zakład Produkcji Rur** was registered as an independent company on 1st January, 2000 in course of Huta Buczek S.A. restructuring process. Our majority shareholder is company ROHRWERK MAXHÜTTE GmbH. Our considerable experience in precision steel tubes manufacturing dates back to 1882 when the old Steelworks Huldschynsky was built and we, the Department of Drawing gained our first experience. Today we have over 100-years-old tradition of cold drawn steel tubes manufacturing.

We cater for the needs of the niche market and feel proud to meet the requirements of a specific customer segment. We specialize in the manufacturing of welded and seamless precision steel tubes with diameters ranging from 4 to 95 mm and wall thickness ranging from 0.5 to 5 mm.

The main customers of our products are motor industry companies which constitute about 70,0% of our sales volume. The companies include such marks as Volvo, Opel or Fiat. The remaining production volume is supplied to the following consumers:

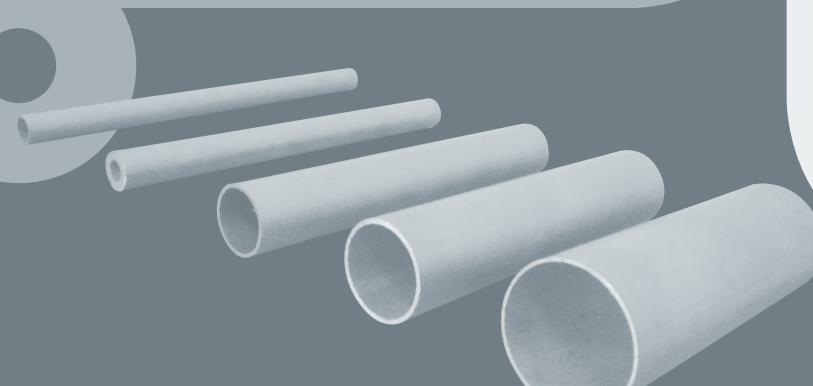

- household appliances manufacturers,
- agriculture,
- sugar factories,
- power industry – heat exchangers, pressure installations,
- sport and tourism,
- furniture manufacturers.

Buczek – HB – ZPR operates a strict quality control policy. At the very beginning of our existence in the market we decided to implement a Quality Management System. We are in the possession of DIN EN ISO 9001:2000 and DIN EN ISO 14001:1996 and we are implementing ISO TS 16949 system.

Our company is also recognized by ZETOM, PRS, Lloyd Register, BV and UDT as a manufacturer of ship, boiler, precision, structural and general-purpose tubes.

Our products have National Quality Marks, Quality Qualification Certificates and Safety Marks.

We are a member of the Metallurgic Industrial and Commercial Chamber with its registered office in Katowice.

**THE TUBE MANUFACTURER BUCZEK – HB – ZAKŁAD PRODUKCJI RUR SPÓŁKA Z O.O.**

**WIR BIETEN AN:**

- Präzisionsrohre mit Naht nach PN-H-74243:1992, PN-EN10305-2
- Nahtlose Präzisionsrohre nach PN-H-74240:1991, PN-EN10305-1
- Nahtlose Kesselrohre nach PN-H-74252:1985, PN-EN10216-2
- Nahtlose Mehrzweckrohre nach PN-H-74220:1984
- Nahtlose Rohre für Flugwesen nach PN-H-74245:1996
- Nahtlose Formrohre nach BN-73/0658-01, PN-EN10305-1
- Formrohre mit Naht nach BN-73/0658-01, PN-EN10305-2

Hilfsbeschreibungen:

1. Lieferrzustand

- BK (+C)** – die Rohre ohne Wärmebehandlung nach letztem Zug (weiß-hart)  
**BKW (+LC)** – gezogene Rohre nach letzter Wärmebehandlung mit kleiner Stichabnahme (weiß-weich)  
**GBK (+A)** – die Rohre nach Rekristallisationsglühen  
**NBK (+N)** – die normalisierten Rohre (nach Normalglühen)

2. Ausführungsversion

- A** – tolerierte Abmessungen von Außendurchmesser und Wandungen  
**B** – tolerierte Abmessungen von Innendurchmesser und Wandungen  
**C** – tolerierte Abmessungen von Außen- und Innendurchmesser

**ANGEBOTENE DIENSTLEISTUNGEN:**

- Wärmebehandlung im Temperaturbereich bis 920°C
- Ätzen in Schwefelsäurelösung und Neutralisationsoperationen
- Abrichten und Schneiden von Rohre
- Nachziehen von Rohre für bestimmte Abmessungen

Die Ausführung von Rohre beschränkt sich nicht auf die polnischen Normen. Wir erfüllen auch die Anforderungen der ausländischen Normen.

In der Anlage haben wir unser Fabrikationsprogramm vorgeführt. Die Ausführung der sonstigen Abmessungen (die nicht im Fabrikationsprogramm zusammengestellt worden sind) ist nach vorheriger Abstimmung möglich.

**OFFERS:**

- Welded precision steel tubes conforming with DIN 2393, PN-EN10305-2
- Seamless precision steel tubes conforming with DIN 2391, PN-EN10305-1
- Seamless precision steel boiler tubes conforming with DIN 17175, PN-EN10216-2
- General-purpose seamless steel tubes conforming with PN-H-74220:1984
- Aircraft seamless steel tubes conforming with PN-H-74245:1996
- Seamless steel profile tubes conforming with DIN 2391, PN-EN10305-1
- Welded steel profile tubes conforming with DIN 2393, PN-EN10305-2

Markings:

1. Product state at delivery
- BK (+C)** – tubes not heat-treated after the last cold draw pass  
**BKW (+LC)** – tubes drawn with light roll load after the last heat treatment  
**GBK (+A)** – tubes after recrystallization annealing  
**NBK (+N)** – normalized tubes

2. Variant of realization

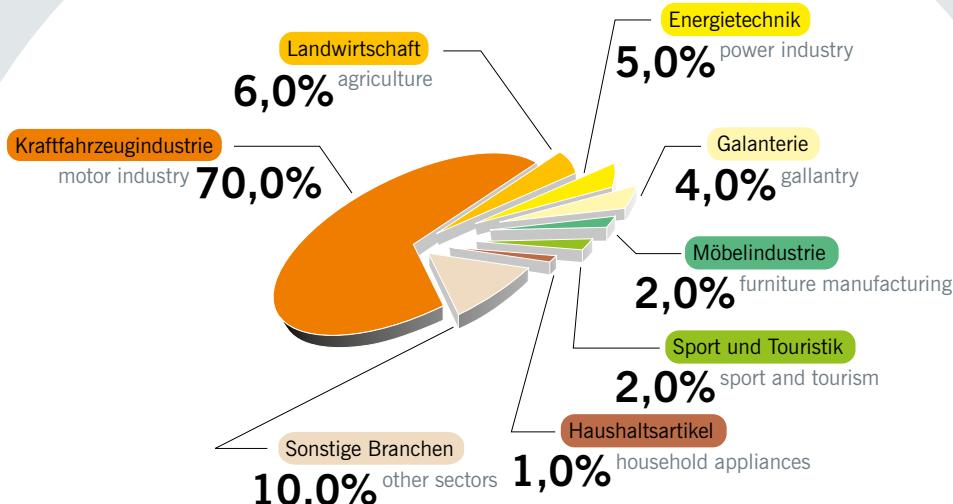

- A** – toleranced dimensions of outside diameter and wall thickness  
**B** – toleranced dimensions of inside diameter and wall thickness  
**C** – toleranced dimensions of outside and inside diameter

**ADDITIONALLY, WE PROVIDE THE FOLLOWING SERVICES:**

- Heat treating in the temperature range of up to 920°C
- Pickling in dilution of sulfuric acid and neutralization
- Tube straightening and cutting
- Drawing tubes to required dimensions

We manufacture tubes which conform with both Polish and foreign standards. Please find enclosed our product offer. Dimensions not included in the product offer must be agreed on.

### BESTIMMUNG

Die geschweißten und nahtlosen Stahlrohre sind vorwiegend für die Konstruktionszwecke bestimmt. Diese Rohre kennzeichnen sich durch die gute Oberflächenbeschaffenheit und hohe Maßhaltigkeit. Unsere Rohre finden hauptsächlich die Anwendung in der Kraftfahrzeugindustrie. Sie können ebenfalls die Anwendung im Falle der Anforderung von Ausführung der nicht typischen oder besonders genauen Abmessungen finden.

### DICHTIGKEIT

Die Untersuchung von Dichtigkeit erfolgt ausschließlich auf Antrag des Auftraggebers (Bestellers).

### LÄNGE

Die Rohre werden in den Fabrikationslängen von 2 – 9 m oder in den genauen Längen angeliefert.

### USE

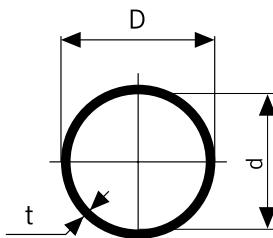

Welded and seamless steel tubes are made mainly for construction purposes. They have good surface finish quality and highly accurate dimensions. Our tubes are mainly used in the motor industry. However they can also be used when nontypical and specifically precise dimensions are required.

### LEAKTIGHTNESS

Leaktightness is checked only on customer request.

### LENGTH

The tubes are supplied in the manufacturer's lengths of 2 – 9 m or required lengths.

Profil – rund

### Quadratprofil

Die Stahlrohre mit Quadratprofil werden unter Anwendung der Kaltziehentechnik hergestellt. Diese Rohre sind vorwiegend für Konstruktionszwecke ausgenutzt. Ausführungszustand: NBK, GBK, BKW

### Square profile

Square steel tubes are made with the employment of cold drawing technology. They are used mainly for construction purposes. Product realization state: NBK, GBK, BKW

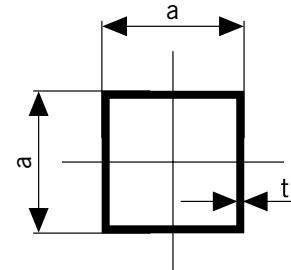

**BN-73/0658-01**

**PN-H-74243:1992**

**DIN 2393, PN-EN10305-2**

**PN-H-74240:1991**

**DIN 2391, PN-EN10305-1**

### Rechteckige Profil

Die Stahlrohre mit rechteckigem Profil werden unter Anwendung der Kaltziehentechnik hergestellt. Diese Rohre sind vorwiegend für Konstruktionszwecke ausgenutzt.

Ausführungszustand: NBK, GBK, BKW

### Rectangular profile

Rectangular steel tubes are made with the employment of cold drawing technology. They are used mainly for construction purposes. Product realization state: NBK, GBK, BKW

# STAHLROHRE

## NAHTLOSE PRÄZISIONSTAHLROHRE

# STEEL TUBES

## SEAMLESS PRECISION STEEL TUBES

### Kesselrohre

#### AUSFÜHRUNG UND BESTIMMUNG

Die nahtlose Kesselrohre werden in Buczek – HB – Röhrenwerk als gezogene Rohre erzeugt. Diese Rohre kennzeichnen sich durch die hohe Maßhaltigkeit. Sie sind für den Betrieb in erhöhten Temperaturen bestimmt. Die Rohre werden im Bau von Kessel, Druckbehälter sowie Dampf- und Wasserrohrleitungen eingesetzt.

Das Buczek – HB – Röhrenwerk ist vom UDT (Amt für Technische Überwachung) zur Herstellung von Kesselrohre zugelassen.

### Boiler tubes

#### REALIZATION AND USE

Seamless steel boiler tubes are made in Buczek – HB – ZPR with the employment of drawing technology. They have highly accurate dimensions. The tubes are intended for high – temperature service. They are used for building boilers, pressure vessels as well as water and steam pipelines.

Buczek – HB – ZPR is authorized by UDT to manufacture boiler tubes.

## Leitungsrohre

Diese Stahlrohre können ebenfalls für Konstruktionszwecke ausgenutzt werden.

### Steel line pipes

The pipes can be used for construction purposes.
